

For Immediate Release-February 1, 2006

**Analytic Systems provides High Performance Voltage Converters Ministry of Defense - Morocco
Surrey, BC, Canada. (February 1, 2006)**

Analytic Systems, a Canadian manufacturer of high performance power conversion products for military and commercial/industrial applications, has won a contract from the Ministry of Defense in Morocco, through one of its US agents. One hundred units of a specialized high output voltage converter, model number VTC120ih-12-15, are to be used for a military communications application. The unit is modified for and has been trialed in the Moroccan desert at very high temperatures. This is similar to a unit Motorola spec'd for 600+ cellular tower sites in Malaysia.

Analytic Systems, of Surrey, B.C., Canada, (www.analyticsystems.com) manufactures a wide range of high performance Power Conversion products including AC and DC source Battery Chargers, DC to DC voltage converters, AC to DC power supplies and DC to AC inverters for Military, Communications, Marine, Industrial, and Alternative Energy applications throughout North America and around the world.
