

**FOR IMMEDIATE RELEASE**

**Analytic Systems Provides Power for US Army Tactical Comms**

February 2, 2012, Delta, BC, Canada, Analytic Systems has received their first contract for their high performance customized DC/AC Inverters (model IPS300-24-110UE) that will power equipment within the US Army's AN/TRC-190 tactical communication shelters. Ultra Electronics TCS contracted Analytic Systems to provide Analytic Systems' inverters due to their high reliability and rugged designs.

Ultra Electronics, TCS, a world leader in tactical communications has had an IDIQ contract for several years with the US Army's Warfighter Information Network-Tactical, and the Analytic Systems' inverter is currently used for specific tasks against that contract.

Analytic Systems, [www.analyticsystems.com](http://www.analyticsystems.com) is proud to be a partner with Ultra Electronics TCS in this project designed to save Warfighter's lives. Analytic Systems is committed to innovative and cutting edge technology in the design and development of Military DC/DC Converters, MPPT Solar Charge Controllers, Inverters, Battery Chargers and Power Supplies. Clients include: Textron Systems, Northrop Grumman, AAI Corp., US Marines, Lockheed Martin, Raytheon, UEC Electronics, Teleflex Canada, US Navy, Datron, Navistar, US Army, Boeing Corp, FPI, US Marines, and GD-OTS.
