FOR IMMEDIATE RELEASE

Analytic Systems Certified to ISO 9001-2008

January 20, 2017, Delta, BC, Canada

Analytic Systems is pleased to announce they have recertified to the International Standards Organization, ISO 9001:2008 quality standard. After making the difficult decision to voluntarily suspend their certification in September, 2016 and seek re-certification with registrar CMA Quality International, the company thanks all their employees, consultants and auditors for their hard work to successfully complete the process as of January 20, 2017 for both their electronics manufacturing division and Metal Action aerospace CNC machining division.

ISO standards make the development, manufacturing and supply of products and services more efficient, safer and cleaner. They make it easier to share technological advances and good management practices as well as to disseminate innovation. The widespread adoption of International Standards means that suppliers can develop and offer products and services meeting specifications that have wide international acceptance in their sectors, allowing them to supply customers in many markets around the world.

Analytic Systems, of Delta, B.C., Canada, (www.analyticsystems.com) manufactures a wide range of high performance Power Conversion Products including AC and DC source battery chargers, DC to DC voltage converters, AC to DC power supplies, DC to AC inverters and Solar MPPT Charge Controllers. We focus on high end markets such as Military, Commercial Marine, Industrial, Rail/Transit, Mining, Heavy Duty Trucking, Alternative Energy and Telecom applications throughout North America and around the world.

Metal Action Machining (www.metalactionmachining.com) is the primary supplier of CNC machined parts to Analytic Systems, but also manufactures precision machined metal and plastic parts for other electronics companies as well as to aerospace and other industrial clients.

Analytic Systems has been building voltage converters, inverters, power supplies and battery chargers for the Marine, Military, Industrial, Telecom and Transportation markets since 1976. Based in Greater Vancouver, British Columbia, Analytic Systems manufactures all its products in house, keeping jobs and creating quality in North America.
